

Finally we had a meeting in the Clubhouse. It gave us a chance to learn about the services provided by the Frederick County Emergency Medical Services.

Emergency Medical Services, more commonly known as EMS, is a system that provides emergency medical care. Once it is activated by an incident that causes serious illness or injury, the focus of EMS is emergency medical care of the patient(s).

EMS is most easily recognized when emergency vehicles or helicopters are seen responding to emergency incidents. But EMS is much more than a ride to the hospital. It is a system of coordinated response and emergency medical care, involving multiple people and agencies. A comprehensive EMS system is ready every day for every kind of emergency.

Emergency Medical Services is the largest section within the Frederick County Division of Fire and Rescue Services with over 300 uniformed full time and part-time employees who are assigned to fire/rescue stations throughout Frederick County.

Their mission statement is to safely provide Fire, Rescue and Emergency Medical Services while educating, reducing risk and protecting our community in a professional, efficient manner with a well-trained, healthy workforce.

Did you know that there is a subscription available for a nominal cost that entitles you to unlimited ambulance Emergency Medical Services within Frederick County?
